📁 Professional Projects (Company Work)

1. CRM System (Laravel + Nuxt.js + Tailwind CSS)

- Built and customized a Customer Relationship Management (CRM) platform for lead tracking and client communication.
- Developed modules for user roles, permissions, lead pipeline, and activity logs.
- Used **Laravel** for backend APIs and **Nuxt.js** for SSR-based frontend with enhanced performance.

2. Online Academy Platform (Laravel + Vue.js + Tailwind CSS)

- Developed a full-featured learning management system (LMS) with courses, quizzes, and progress tracking.
- Implemented teacher/student roles, payment integration, and responsive UI with Tailwind CSS.
- Ensured secure content delivery and optimized API endpoints for performance.

3. Asset & Profit Management System (Laravel + Vue.js + Tailwind CSS)

- Created a system for tracking company assets, profit/loss, and expenses.
- Built dashboards with real-time data visualization using Vue components and Tailwind utilities.
- Integrated role-based access and reporting features.

4. Event Management Platform (Laravel + Vue.js + Tailwind CSS)

- Developed tools for event scheduling, registration, and attendee management.
- Built custom calendar views, notifications, and user management.
- Focused on UX with responsive design and clean Tailwind CSS integration.
